**DETAILED ACTION*****Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 34 is rejected under 35 U.S.C. 102(e) as being clearly anticipated by US Patent 6646694 (“694”).

Per claim 34, 694 teaches a method for repairing a signal line with an open in an LCD, the method comprising the steps of: connecting a first pixel electrode to a first side of the signal line; connecting a second pixel electrode to a second side of the signal line [see connect B-C]; and connecting the first pixel electrode to the second pixel electrode to establish a current path across the open [see connection D-E].

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 34 is rejected under 35 U.S.C. 103(a) as being unpatentable over Applicants prior art figure 2b in view of 694.

Per claim 34, prior art figure 2b teaches a method for repairing an open gate line in an LCD, the LCD including a plurality of gate lines arranged on a substrate, a plurality of data lines that intersect with the gate lines to delineate a plurality of pixel areas, thin film switching transistors disposed proximate to gate line and data line intersections, and pixel electrodes

disposed at the pixel areas, the method comprising the steps of: when a gate line includes a gate open at an intersection with a data line, connecting that gate line with a first pixel electrode overlapping a portion of the gate line. Figure 2b lacks connecting first and second adjacent pixel electrodes together across the gate open. However, 694 teaches connecting multiple adjacent pixel to bypass openings in data lines in order to repair a fracture in the signal path. Accordingly, it would have been obvious to one of ordinary skill at the time of invention to combine the connection of multiple pixels with prior art figure 2b.

***Allowable Subject Matter***

Claims 1-4, 6-12, 14, 27-31 and 33 are allowed.

***Conclusion***

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

***Response to Arguments***

Applicant's arguments filed 10/17/05 have been fully considered but they are not persuasive. Applicant didn't address claim 34 and why it is distinguished of the rejection.
